

Photo Taken with Mothers

In December 2023, the Fifth National Conference of Mothers was held in the DPRK.

Addressing the conference, the respected Comrade Kim Jong Un appreciated all the mothers in the country for cherishing the most intimate and sacred appellation—"mother," devoting themselves for the wellbeing of their children and other family members and for the prosperity of the country, and displaying the ennobling mental and moral traits as befitting the most admirable women in the world. He wished them good health and happiness, before posing for a photo with them.

The participants in the conference were moved to tears as they had hardly expected that such an honour would be accorded to them since they had merely performed the basic duty they assumed for their families and society.
