

## Most Important and Primary Work

In May 2016, the respected Comrade Kim Jong Un gave field guidance at the construction site of the medical oxygen factory under the Ministry of Public Health.

He had personally chosen the site for the factory and solved all problems arising in its construction.

That day, looking round the dusty construction site, he praised the builders for having done a lot of work.

He said: At present, we have many things to do, but nothing is more important than the work for promoting the people's wellbeing. Healthcare is a primary undertaking in this work.

And he underscored the need to build more medical oxygen factories in different parts of the country.
