

Dairy Products Supplied Without Letup

One September day in 2022, the respected Comrade Kim Jong Un had a talk with senior officials of the Party Central Committee about the issue of supplying dairy products to children in nurseries and kindergartens.

At that time, as the nurseries and kindergartens were closed due to the emergency anti-epidemic situation, the children were not supplied with dairy products.

Comrade Kim Jong Un said: The nurseries and kindergartens were closed during the emergency anti-epidemic period, but you must have established a system of supplying dairy products to ensure that the parents receive the products with a coupon. Even by applying such a method, you should normalize the supply of dairy products to the children.

Looking at the officials, he earnestly stressed: The Party's new childcare policy is aimed at fostering the rosier future of the country by promoting the physical growth of all the children. The Party decided to feed children dairy products all year round. We should implement the Party's childcare policy correctly.
