

Meticulous Care for Schoolchildren

The following happened in November 2016 when the respected Comrade Kim Jong Un visited the Samjiyon Schoolchildren's Palace.

After looking round several places of the palace, he dropped in at the gym.

Noting that schoolchildren might have a cold while taking exercises if the indoor temperature of the gym is low, he earnestly stressed the need to keep the temperature to be over 15°C.

Turning the topic to the floor of the gym, he said: The children might get hurt while taking exercises here. I will send rubber mats for covering the floor of the gym.

Many people regarded it as a trifling issue to ensure the temperature of the gym and cover its floor with rubber mats. But Comrade Kim Jong Un, who treasures and loves the children most, saying they are the masters who would shoulder the future of country, regarded it as the most important matter that could never be overlooked.
